Minutes From SERC Meeting 8/1/16

The SERC Meeting was called to order at 7pm. There were 18 present one new person Jim N4NCG.

The treasurer's report was given and accepted. The Technical committee reported that all four repeaters were working ok.

Brent W8XG mentioned that the frequency of his gateway was moved to 144.95mhz and that the freq of the digipeter at the 73 tower site will be moved to this freq also soon. And indeed it was. ED: All digital (packet) frequencies in Sarasota county have been moved to 144.950 MHz.

A new HF frequency PACTOR 4 version of win link will be available soon. It will allow e-mail from UHF to low band and vice versa. However we can not use it until it is approved.

So far six hams are building raspberry pie computers with tnc's , this will allow them to compose their own e-mails on their portable packet stations.

Some discussion was had about Handi Billie, Bilge pump, Gibson Girl and German army Radios .They were on 500khz . A guy named Gibson designed the Gibson Girl radio. It looked like a girl.

The meeting was closed around 7:30pm
